EXPERIENCE -

Product Researcher - [Darzy.ai](https://darzy.ai) • Remote May 2025 - August 2025

- Served as the Lead Product Researcher, identifying and understanding the needs, challenges, and motivations of stakeholders and consumers through primary and secondary research—including user interviews, quantitative surveys, literature reviews, retail relationship management, and participation in product demo sessions.
- Led a team of interns through participant recruitment, user interviews, and data analysis. Collaborate closely with the founder and product designer to uncover design and communication opportunities that address user and stakeholder needs.

Research Assistant - Indiana University • Indianapolis, IN January 2024 - present

- Partner with MS HCI co-directors on two ongoing research projects. In the first, lead user research on voice assistant systems for older adults by conducting interviews with caregivers and seniors, contributing directly to prototype iteration and market positioning.
- In the second role, collect and analyze quantitative data on sustainability, conduct user testing at the Indiana State Museum, and co-facilitate workshops with narrative and design teams to improve museum interactive systems.

Textile Wholesaler - Bloomington, IN & Indianapolis, IN October 2020-present

- Specialize in American-made clothing from the late 1800s to early 2000s, curating collections for second-hand boutiques across the U.S. and working with international clientele.
- Support personal stylists by sourcing and curating wardrobe pieces for active NFL players.

Freelance Photographer - Indianapolis, IN & Bloomington, IN March 2019 - present

- Focus on urban and street fashion portraiture throughout Indianapolis and Bloomington.
- Collaborate with local brands—including SLCT Stock, Kitowares LLC, and Native Language Co.—to deliver creative direction and visual storytelling.
- Utilize both digital and film formats, including Canon 60D (24–105mm f/4 and 50mm f/1.8 lenses), Canon AE-1, Mamiya 645, and Olympus point-and-shoots.

EDUCATION -

Indiana University - Indianapolis Bachelors in Informatics with certification in Human-Computer Interaction 2018 - 2024

Currently pursuing a Master's Degree in Human-Computer Interaction with a focus in accessible design and UX Research. 2024 - 2026

COURSE PROJECTS -

Energy Systems Network (ESN) 2024

- My team researched industry forces for energy tracking in warehouses and plants, finding that economic challenges from the global pandemic have driven government incentives for improved energy efficiency.
- Interviewed stakeholders, including plant managers and ESN representatives, to address user needs. Created low-fidelity wireframes for AI-assisted dashboards, developed solutions, and conducted user testing of the high-fidelity prototype with potential users for feedback and improvement.
