Position Summary

Role Overview: As a Senior UX Product Designer for the Deloitte DT-US Product Engineering team, you will be tasked with solving complex challenges through elegant, user-centered design solutions. Our ideal candidate is a versatile design generalist with deep expertise in interaction design. You should feel equally at home shaping big-picture workflow and strategy as you are prototyping details visual and interaction elements. This role requires a proven track-record of experience-driven innovation. Join us in shaping the future of design!

Key Responsibilities:

- Collaborate with cross-functional teams to design engaging and intuitive user experiences using an iterative lean UX approach of continuous improvement
- Create big-picture workflows as well as execute detailed visual & interaction design
- Create user-friendly designs that enhance usability and optimize the overall user experience, while identifying design challenges and proposing elegant, effective solutions.
- Produce all design assets including concept designs, user flows, wireframes, user scenarios, journey maps, mockups, etc. that support intuitive and seamless user interactions.
- Conduct heuristic evaluations of existing products to identify areas for improvement.
- Develop innovative approaches to complex design problems, presenting your ideas through mockups, presentations, and detailed design specifications.
- Work within a small, empowered product team to balance business objectives with user needs, collaborating with engineers to ensure smooth implementation of designs.

-
- Collaborate with user researchers to inform design decisions, contributing to studies that explore unresolved user interface issues and opportunities.
 - Continuously challenge design effectiveness, monitor behavioral analytics, and suggest improvements to optimize user experiences.
 - Contribute to the overall design framework, ensuring consistent design language and experiences across the product suite.
 - Ask insightful questions, take calculated risks, and champion new ideas to drive innovation.
 - Stay up to date with the latest UX trends, best practices, and methodologies in areas like information architecture, interaction design, and usability.
 - Operate effectively in both collaborative environments with other UX designers and autonomously when acting as the sole UX designer on a product squad.
 - Deliver high-quality UX work on time, showcasing your expertise in user experience design and detailed interactions.

Required Qualifications:

- 5+ years as an interaction or product designer with a strong track record of crafting user interfaces that engage and delight users.
- 5+ years of recent proficiency in industry-standard UX tools, preferred experience with Figma but open to additional technologies including Sketch, Adobe CC, Axure, InVision, UXPin, and Balsamiq, ensuring efficient design workflows.
- 5+ years of hands on experience and proficiency in interactive design principles, consistently delivering simple, elegant, and aesthetically pleasing interfaces rooted in usability and accessibility.
- Proficient in designing for both desktop and mobile platforms, with a focus on responsive and adaptive design that enhances the user experience across devices.
- Degree in Interaction Design, Human-Computer Interaction, Cognitive Psychology, or a related field
- A strong portfolio or samples of work demonstrating experience and UX skills is required
- Limited immigration sponsorship may be available
- Ability to travel 0-10%, on average, based on the work you do and the clients and industries/sectors you serve

Preferred

- Driven by a passion for solving user pain points, leveraging design thinking and user feedback to create seamless experiences.
- Highly creative and analytical, able to navigate between strategic vision and hands-on execution, ensuring solutions are innovative and intuitive.

outcomes.

- Deeply passionate about UX and innovation, constantly exploring new design trends and methodologies to stay ahead.
- Strong organizational and time-management skills, able to prioritize tasks effectively and work independently to meet deadlines.

The team: US Deloitte Technology Product Engineering has modernized software and product delivery, creating a scalable, cost-effective model that focuses on value/outcomes that leverages a progressive and responsive talent structure. As Deloitte's primary internal development team, Product Engineering delivers innovative digital solutions to businesses, service lines, and internal operations with proven bottom-line results and outcomes. It helps power Deloitte's success. It is the engine that drives Deloitte, serving many of the world's largest, most respected companies. We develop and deploy cutting-edge internal and go-to-market solutions that help Deloitte operate effectively and lead in the market. Our reputation is built on a tradition of delivering with excellence.

The wage range for this role takes into account the wide range of factors that are considered in making compensation decisions including but not limited to skill sets; experience and training; licensure and certifications; and other business and organizational needs. The disclosed range estimate has not been adjusted for the applicable geographic differential associated with the location at which the position may be filled. At Deloitte, it is not typical for an individual to be hired at or near the top of the range for their role and compensation decisions are dependent on the facts and circumstances of each case. A reasonable estimate of the current range is \$97,000 – \$200,000.

You may also be eligible to participate in a discretionary annual incentive program, subject to the rules governing the program, whereby an award, if any, depends on various factors, including, without limitation, individual and organizational performance.
